WORK EXPERIENCE

Diggibyte Technology Pvt Ltd | 2025 - Present

Trainee Data Engineer

- Working on data ingestion, transformation, and pipeline development using Python and SQL.
- Assisting in building ETL workflows, data validation scripts, and automation tasks.
- Working with Databricks, Delta Tables, Delta Live Table, Unity Catalog for managing structured and semi-structured data.

Vee Technology Pvt Ltd | 2021 - 2024

Associate Software Engineer

- Built dynamic and responsive Angular applications using components, services, and directives.
- Optimized performance through lazy loading, reusable modules
- Fixed production issues, performed debugging, and improved overall code quality.
- Worked closely with backend and QA teams in Agile/Scrum sprints.
- Mentored junior trainees on Angular basics and best practices.

PROJECT

Netcore - Databricks Migration Project (Data Engineering)

- Migrating Netcore's large-scale Vertica database to Databricks Lakehouse to improve scalability, performance, and governance for Insight Agent Creation.

Centralized Portal - (Attendance & Leave Management)

- Developed modules for attendance, leave requests, approvals, and document access.
- Improved internal process efficiency through a unified portal.

Internal Ticketing System (ITS)

- Developed a internal portal for managing queries, issues, and support requests.
- Designed intuitive UI screens for raising, tracking, and resolving internal tickets.

SKILLS

- Data Engineering: Python, SQL, Databricks, PySpark, ETL Pipelines, Delta Lake, Medallion Architecture, Unity Catalog, Delta Live Table.
- Frontend: Angular, TypeScript, JavaScript, HTML, CSS, Angular Material

EDUCATION

Sona College of Technology | Anna University

BE (Electronic & Communication Engineering) - 8.84 / 10
